

A NEW FAST EXPEDITION YACHT

FATHOM 40

Fathom Yachts launches a new class of yacht with the Fathom 40, the first in a series of fast expedition yachts. Designed by Greg Marshall and built in America, the Fathom 40 is a spacious motoryacht built for those who covet style with speed and fuel efficiency.

The Fathom 40 styling is modern and distinctive, but maintains a classic profile. The soft yet bold lines set Fathom apart from the typical trawler or workboat style and place it in a class of its own. The Fathom 40 is a handsome expedition style motoryacht with unique features not found on other yachts.

The Fathom 40's wide beam provides stability and enormous interior space. Two comfortable staterooms, an ensuite head, and spacious salon rival the features of a much larger yacht. The raised expedition style pilothouse provides a perfect gathering spot with a settee for five. Both the leather helm chair and raised settee provide excellent visibility around the boat. The starboard pilothouse door provides access to the deck. A unique folding transom lowers to expand the aft deck for access and adventure.

Fathom utilizes modern CAD, engineering, tooling, and manufacturing techniques that allow unmatched quality, performance, and fuel efficiency. Weight-saving composite materials, a propeller tunnel, and an efficient hull design allow the Fathom 40 to burn significantly less fuel while cruising comfortably from displacement speeds to the high teens with a single electronic diesel. Contact Fathom Yachts at (360) 336-5414 for more information.

FATHOM 40

A NEW FAST EXPEDITION YACHT

The Fathom 40 provides the comforts of a home in forty feet while maintaining graceful lines. It is truly amazing that a yacht this size can provide a large salon / galley and accommodates two comfortable staterooms. The salon includes a settee for six and room for two barrel chairs. Forward of the settee is the large "U" shaped galley with granite counter tops, high-end stainless appliances and abundant storage. A central hallway leads forward from the galley, under the pilothouse, to the two spacious staterooms and head. The large hose-out head features a granite counter and separate shower with 7 feet of headroom. The large windows in the head and staterooms provide great light and ventilation.

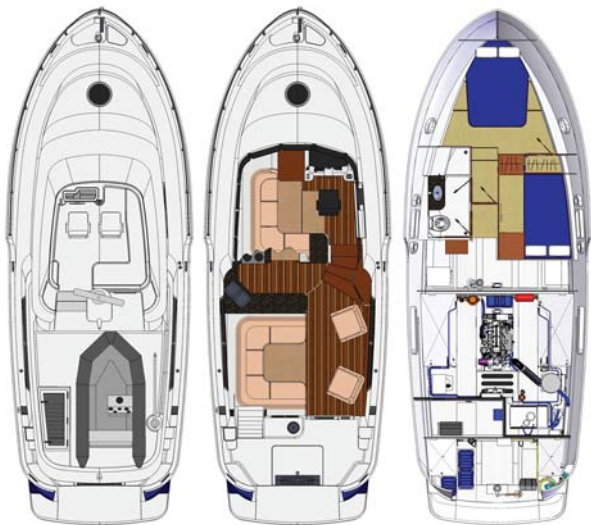

The folding transom makes getting on and off the boat easy and safe. The aft deck stairs lead to the large upper deck and standard flybridge. These stairs lift to reveal the mid-lazarette with stand-up headroom and a door to the engine room. Wide walk around decks make it easy and safe to move about the boat.

Greg Marshall designed the Fathom 40 to provide performance without requiring twin engines or large amounts of horsepower. The single 425 hp common rail diesel allows owners to run at displacement speeds or cruise in the teens. An advanced hull design with a propeller tunnel results in greater efficiency, less draft and less fuel consumption. The Fathom 40 has the performance of a twin-engine boat with the efficiencies and practicality of a single engine.

The hull is broad, yet has a narrow bow to cut through the waves. The Fathom 40 is designed to provide a stable, dry, and comfortable ride. The large manganese bronze rudder and standard bow and stern thrusters make the 40 easier to operate than a twin screw boat.

The Fathom 40 is outfitted with the finest components, equipment, and hardware available. Nearly everything is standard equipment including thrusters, Glendenning power cord reel and AC/diesel heat. Mechanical and electrical systems rival any yacht on the market. Fathom Yachts are designed to exceed ABYC and CE construction guidelines. Safety at sea is paramount and Fathom makes no compromises. Advanced engineering and manufacturing combined with American quality elevate the Fathom 40 to a new level of sophistication and safety in its class.

The Fathom 40 embodies the perfect balance of many features and its introduction is timely in a world of high fuel costs. Get aboard the new Fathom 40, a fast expedition yacht providing comfort, performance, efficiency, quality, and style. Contact Fathom Yachts at (360) 336-5414 or www.fathomyachts.com for more information and to locate your local dealer.

SPECIFICATIONS

LOA	40' 4"
LWL	36' 1"
Beam	14' 6"
Draft	42"
Standard Power	425 hp
Displacement	24,000 lbs
Fuel	400 gal
Fresh Water	135 gal
Grey Water Tank	45 gal
Black Water Tank	45 gal
Sleeping Capacity	4 - 6+
